Co. L¹, Land in heavy level open & third rate
& the timber is W & B. Oak, marsh prairie
& third rate High red top grass water lot etc,
sep May 5th - 1834 - A. C. Kump D^r,

The face of the country is level in
general & the soil is poor & sandy in the
wood land, & the timber is B. & W. Oak
chiefly & of a small growth, & the W. O.,
is Oak whistle & paper, bushes. The wet
& dry prairie are separate & the growth
thereon is coarse red top grass, the marsh
prairie are much the largest, & the soil
is poor being a thin brown loam, red
thin & rotten & the grass thereon is a
fine red top & of a thin growth. They are
also interspersed with groves of W. Oak,
& whistle etc, The water is very frequently
from 12 to 24 inches in depth on the wet
marshy prairie & no current perceiv-
- able in any direction

These old Indian traces, are so dim
in many places as scarcely to be perceived
& more especially in the marshy places
where they frequently branch off, for
the purpose of crossing places. -
